## Kingman County FSA

1137 E HWY 54  
Kingman, Kansas 67068  
(620) 532-3116 – Tele.  
(620) 532-1068 - Fax.

### Hours:

Monday – Friday  
8:00AM – 4:30 PM

### County Committee

Mike Demmer, Chairperson  
Arland Stephens, Vice-Chairperson  
Bernard Albers, Regular Member

**COC meeting: 1<sup>st</sup> Wednesday of each month at 8:00 a.m.**

### Office Staff:

Greg Weaver, Co. Executive Director  
Vanessa DeWeese, Program Technician  
Debra Osborn, Program Technician  
Dianne Taber, Program Technician  
Sondra Ward, Program Technician  
Kenny Depenbusch, Field Assistant

### 2006 DATES TO REMEMBER

**Feb. 20 – Closed for Presidents Day**

**Mar 27-Apr 14 – CRP Sign- up**

**March 31 – Final date to request a 2005 loan and/or LDP on wheat or oats.**

**May 29 – Closed for Memorial Day**

**May 31 – Final date to request a 2005 loan and/or LDP on milo, corn, soybeans or sunflowers.**

**May 31 – Final date to report 2006 wheat, oats and barley acreages.**

**June 1: Final date to signup for the 2005 DCP program (Farm Program).**

### DIRECT DEPOSIT

**Promptly** inform FSA of closed financial accounts or other changes affecting direct deposit (Electronic Funds Transfer – EFT). FSA cannot deposit payments to accounts that no longer exist.

### 2006 FARM CHANGES

Changes must be reported to our office within 30 days from the occurrence. This is very important because the changes must be made in our files and revised contracts must be completed, signed and returned to our office prior to June 1, 2006. Therefore, if you have any changes please notify our office as soon as possible. It seems like we take farm changes daily.

### COMMITTEE ELECTION RESULTS

LAA #1 in Kingman County held an election in December 2005, for a County Committee member. Bernard Albers was elected to a three-year term. We congratulate Bernie and thank him for his willingness to serve the farmers of Kingman County.

### REPORT FAILED ACREAGE

While the majority of wheat acreage is in fair to good condition, farmers should still be aware of their responsibility to file a failed acreage report anytime a crop has failed. Filing should be made with our agency and your crop insurance agent (if applicable).

#### Non-Discrimination Statement

The U.S. Department of Agriculture (USDA) prohibits discrimination in all its programs and activities on the basis of race, color, national origin, age, disability, and where applicable, sex, marital status, familial status, parental status, religion, sexual orientation, genetic information, political beliefs, reprisal, or because all or part of an individual's income is derived from any public assistance program. (Not all prohibited bases apply to all programs.) Persons with disabilities who require alternative means for communication of program information (Braille, large print, audiotape, etc.) should contact USDA's TARGET Center at (202) 720-2600 (voice and TDD). To file a complaint of discrimination, write to USDA, Director, Office of Civil Rights, 1400 Independence Avenue, S.W., Washington, D.C. 20250-9410, or call (800) 795-3272 (voice) or (202) 720-6382 (TDD). USDA is an equal opportunity provider and employer.

FEBRUARY 2006

## KINGMAN County FSA News

### CRP EXTENSIONS AND RENEWALS

Information has just been received regarding Conservation Reserve Program contracts which expire on September 30, 2007. This would include the majority of our CRP contracts. Contracts will be either extended or renewed for an additional 10 years. FSA used the Environmental Benefits Index (EBI) to determine eligibility for CRP re-enrollments or extensions. The EBI addresses expected benefits to water quality, erosion, enduring benefits, air quality and wildlife habitat.

All contracts expiring in 2007 from all over the country were ranked according to the contract's EBI score. The Top 20% will be able enter into a new 10 year contract. The next 20% will be offered a 5 year extension of the current contract. The next 20% will be offered a 4 year extension and so on.

Each contract offered will be required to have a field visit, at the producer's expense, to determine if the required cover is being maintained. This will include looking for trees, weeds, haying & grazing evidence, as well as any other potential violations. Areas not in compliance will not be eligible to be renewed and must be removed from the renewal or extension offer.

If you are on a CRP contract expiring in 2007 you will receive a letter from our office after the middle of February. Please review this letter carefully and follow the instructions if you wish to continue in the CRP program.

### Acreage Reports Required by JUNE 1

We are now scheduling appointments for acreage certification for those crops to be harvested during 2006. For those participating in the 2006 DCP program, to be eligible for DCP payment benefits, all acreage is required to be certified (reported).

**The final date** to certify wheat, barley and oats is **May 31, 2006**. The final date for feedgrains, fallow, CRP and all other crops is **August 1, 2006**.

**Producers with 2006 NAP crops** must certify acreage 15 days prior to: grazing pasture (mid April), or 15 days prior to haying the crop (alfalfa, brome/early May).

**REMEMBER: You can now call to schedule an appointment.**

### 2006 Reconstitutions

Tract/farm reconstitutions involving divisions & combinations are being processed at this time. The final date to apply for a 2006 reconstitution is June 1, 2006. Recons usually result from a change of operator or owner on farm units. Normally, farm divisions will result in base acreage being split in proportion to the resulting cropland acreage for each resulting farm. However, many times the LANDOWNER DESIGNATION method can be used to divide the base acreage as agreed to by all parties prior to an ownership transfer. This method works well with small acreages that will be devoted to residential sites, etc. Contact the FSA office if you have questions regarding this method.

### CRP MANAGED HAYING OR GRAZING

Managed haying OR grazing is authorized 1 out of every 3 years on some (not all) established CRP acres if certain requirements are met. Conservation plans must be revised and approval in writing must be granted before any haying or grazing begins. Haying is only permitted between July 16 and August 15, no extension for weather or any other reason. Grazing cannot begin until July 16 and grazing days depend on stocking rates, not exceed 120 days. There is a 25% per acre reduction in the annual rental payment for acres actually hayed or grazed. CRP planted to forbs or legumes are not eligible for managed haying or grazing.

### FARM STORED GRAIN CONDITION

A number of counties are reporting they are finding quite a few bins under loan where the grain is showing mold on the surface. Most of the problems are in the bins that have the grain peaked. This winter's weather conditions are making it more difficult to store grain. If you have farm stored grain please watch it closely. You may need to aerate your grain fully.

### Check First Before Clearing Land or Altering Wetlands

If you are planning on any land clearing, drainage, filling, existing ditch clean out, leveling or dredging, remember that you need to come into the FSA office and fill out form AD-1026 **BEFORE** you do the work. Then NRCS will determine if the action you want to carry out can be done without jeopardizing eligibility for our programs and other USDA programs. Also, if you have highly erodible fields on any of the land you own or operate, you must be actively applying an approved conservation plan or maintaining a fully applied conservation system in order to remain eligible for our programs.

## **2006 DCP – DIRECT AND COUNTER-CYCLICAL PROGRAM SIGNUP**

Signup is well underway for the DCP 2006 program year. The final date to sign into the DCP program is June 1, 2006.

Contracts were mailed to all farm operators in December 2005 on any farm that did not have a reported change for 2006. If you have not received any paperwork from our office please give us a call. If there are changes and or a reconstitution pending on the farm, realize that these changes are a very time consuming process. Those farms with changes may not be able to be handled immediately.

Advance direct payments of 50% can be requested any month through September 2006.

The final direct payment will be made in October 2006. Advance counter-cyclical (CC) payments may also be requested.

Any farm record changes that could affect the farming operation, such as land ownership, operator, establishing estates, or other changes, need to be reported so the change can be made effective prior to enrolling into the 2006 contract year.

**WE MUST HAVE ALL ORIGINAL SIGNATURES ON THE CONTRACT (CCC-509) BEFORE THE CONTRACT CAN BE APPROVED and IN ALL CASES BY THE JUNE 1, 2006 FILING DEADLINE.**

A \$100.00 fee will be assessed to any farm enrolled after the June 1 deadline. If you have any questions, please contact our office.

## **Farm Storage Facility Loan (FSFL)**

Seven-year fixed interest loans are available through the FSFL program for the purchase and installation of eligible commodity storage structures, handling equipment, drying equipment, and safety equipment (new or remodeled). The loan principal can be up to 85% of the net cost, not to exceed \$100,000 for each "person" borrower. Real estate liens are required for amounts that exceed \$50,000. Crop insurance, for the term of the loan, is required on crops of "economic significance". Producers must pay a loan service fee and "qualify" for this program BEFORE any site preparation begins or equipment is delivered. The producer must allow an environmental assessment survey, demonstrate a need for storage, and show adequate repayment ability. Contact the FSA office for more information.

## **FOREIGN INVESTORS**

Foreign investors who buy, sell, or hold a direct interest in U.S. agricultural land must report their holdings to the FSA office in the county where the land is located. Those buying or selling must report the transaction within 90 days of the date of the transaction.

## **Proper Maintenance of Conservation Reserve Program (CRP) Acres!**

As a Conservation Reserve Program (CRP) participant, you are required to maintain the CRP acreage in accordance with CRP practice requirements. Most of the CRP practices in Rice County are a mixture of "native grasses" or "native grasses and forbs". **A recent clarification of CRP policy prohibits volunteer trees on CRP acreage unless the trees are included in the CRP Conservation Plan of Operations.**

**If you have volunteer trees on your CRP acreage, you must take some type of control measures.**

Controlling the trees can be by mechanical, chemical, or control burning methods. The County Committee was fairly lenient in 2005 as long as you demonstrated an effort to control the trees. **If a field (or an area within a field) has volunteer trees with a canopy of 5 percent or greater, a violation will exist.**

**\*PLEASE NOTE:** Any maintenance measures must occur before the primary nesting season so it will not be detrimental to protected wildlife species. The primary nesting season in Kansas is April 15 through July 15.

**Anytime you plan to burn please be sure to have the proper burn permits before you begin.**

CRP participants also need to be aware of other prohibited activities and/or uses of CRP. Other **prohibited activities/uses** of CRP acreage include, but are not limited to: Asphalt/concrete plants; Trash disposal areas; Parking and/or storage of machinery, junked autos, etc; Livestock feed storage; Permanent roads/trails; Oil/gas wells and associated tanks, access roads, etc; Cosmetic mowing; Mowing of strips for hunting; and installing houses, buildings, etc.

If you have a problem with trees, noxious weeds, roads, or any other item, please address the problem at once. **Failure to maintain your CRP acres can cause penalties to be assessed or possible contract termination.**

To modify your conservation plan you will need to visit with the Natural Resource Conservation Service (NRCS).

If you have any questions, please feel free to contact FSA or NRCS at (620) 257-5184.

## **2006 NAP INFORMATION**

March 15, 2006 is the final application date for 2006 sorghum forage and other spring planted forage crops.

Passed dates for 2006 crops are: 9/1/2005 was the final date for NAP small grains (oats, wheat, and triticale for forage or grazing); and 12/1/2005 for 2006 alfalfa and all grasses for hay or forage.

**NAP production evidence-** \*\*Producers with losses are to notify FSA within 15 days of the loss. As with crop insurance do not destroy the crop until released by a NAP crop loss adjuster. \*\*Producers who do not have a loss are required to provide production evidence to report and verify 2006 production. The producer must pay the cost of a field reporter to verify the production in the field. The production must not be fed before reporting to FSA. If production is fed and therefore not verifiable, the production is not acceptable as eligible production evidence and will not count towards the APH (actual production history). Producers are to provide bale counts and weights when reporting production of baled crops. We must have verifiable weights of the bales.
